Digital Print

Intelligent Interweaving

Whereas in "traditional" wide-format inkjet printers (Mutoh or not) ink is laid down on a substrate in a straight line, Mutoh's patent pending Intelligent Interweaving Technology (i² [pronunciation: I square /æ skwer]) will lay down the ink in a totally different way, e.g. in a "wave form" pattern. Depending on the application or media used, Mutoh's new i² printing technique will vastly reduce or neutralize typical shortcomings inherently linked to inkjet printing, such as horizontal or vertical banding, missing or misfiring nozzles, step mismatch, ink mottle, etc...i² technology - benefits.

Traditional Ink Placement
(Mutoh or not)

Intelligent Interweaving Technology
(Only Mutoh !)

Plotting & Laminating

Offering the traditional quality of Mutoh drag-knife cutting plotters, the Ultima series vinyl cutting plotters (850mm and 1400mm) have been developed for extreme user-friendliness. Moreover, combining the Ultima with any (Mutoh or not) printer is the perfect solution for Print & Cut applications.

Application
Digital and offset graphics, Outdoor signage, Inkjet & Silk-screened
Photo finishing, Large format material, Flexible & Rigid displays,
Decaling and Floor graphics.
